

Executive Business Report

Performance Overview & Supply Chain Insights Dashboard

Executive Summary

The dashboard shows strong financial performance with Total Revenue of 50.20M, Net Profit of 40.03M, and YoY Growth of 19.66%. However, several operational challenges were identified in logistics, inventory management, and regional sales performance.

Key KPIs

- Total Revenue: 50.20M
- Total Cost: 10.16M
- Net Profit: 40.03M
- YoY Growth: 19.66%
- Avg Delivery Days: 5.49
- Late Shipments: 28.73%
- Inventory Value: 199.52M

Business Issues Identified

1. Revenue Volatility

Revenue declined in some years, indicating inconsistent sales performance.

2. Weak Regional Performance

Dammam recorded the lowest revenue among the analyzed cities.

3. High Late Shipment Rate

Nearly 29% of shipments were delivered late, affecting customer satisfaction.

4. High Inventory Value

Large inventory levels may increase holding costs and tie up working capital.

5. Reorder Risk

Some products are approaching reorder levels and require monitoring.

Recommendations

- Reduce late shipments to below 15% through logistics optimization.
- Improve sales performance in Dammam through targeted campaigns.
- Implement inventory optimization and ABC classification.
- Use demand forecasting to improve stock planning.
- Establish KPI monitoring for suppliers, warehouses, and carriers.
- Automate inventory alerts to prevent stock shortages.

Conclusion

The company is financially healthy and profitable, but operational improvements in supply chain management, delivery performance, and inventory control will help sustain future growth and enhance customer experience.
